 - Radio motor/ radio remote control,
 - automatic weather sensor,
 - radiant heater,
 - extra fabric supports

Capri – all aspects well covered

Awning for glass roofs, conservatories or patios

Roof-mounted type

– for use on conservatories or glass roofs.
Supplied as standard with rail holders.
Depending on the type of mounting,
mounting feet and brackets are also
optionally available.

Capri Pergola type: sturdy and decorative as a patio sunshade

The Capri awning is fitted to conservatories and glass roofs as an external sunshade, preventing excessive sunlight from getting in. When used on conservatories in particular, it protects the room from heating up. Available as a single awning or a joined system, this awning is suitable also for large areas and conservatories.

The Pergola type can be used against a patio wall even without a glass substructure.

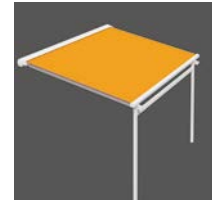

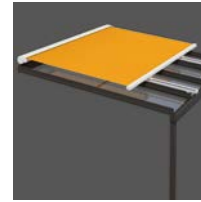

Pergola type

Equipped with support posts, the Capri is a particularly sturdy design for creating shade on the patio. The rails and support posts can be positioned variably as desired.

Capri

Equipment and technical features

Manufactured and assembled in Germany
Quality and technology CE-compliant

Type	Roof-mounted	Pergola
